Recruiter
Flatiron
San Diego, CA

Dear Recruiter:

I am writing this letter to get a chance to interview for the position of Field Engineer. I learned of the opening after seeing it on the University of Arizona careers page.

I am confident I can be a successful Field Engineer at Flatiron. I have considerable experience in designing components in SolidWorks, testing in a Lab setting with LabView, machining metal via manual mill, lathe and CNC, and applying controls theory to optimize systems. I also have experience with HVAC design utilizing ASHRAE Peak Loads, zones and building materials.

At the moment I am working full time, however, I am capable of scheduling an interview within a weeks notice because of the ability to work from home. My phone number is (619)-248-0717. Thank you for taking the time to consider my credentials.

Sincerely yours,

Thomas M. Rodriguez
